

Remy G.

Senior DevOps Engineer - SRE - Infrastructure & Cloud Reliability

remy.devops@gmail.com | (201) 685-4245 | Jersey City, NJ, USA

Professional Summary

Strategic and results-driven Senior DevOps Engineer with 7+ years of experience designing, automating, and optimizing cloud-native infrastructure across AWS, Azure, and GCP. Specialized in CI/CD automation, Kubernetes orchestration, and Infrastructure as Code (IaC), delivering secure, scalable, and high-performance platforms. Proven track record of leading remote-first engineering teams and driving measurable outcomes, including 40% faster release cycles, 99.99% uptime, and 30% cost savings through automation and cloud optimization. Adept at embedding security into DevOps workflows to meet SOC2/ISO compliance and safeguard enterprise systems. Recognized for technical leadership, mentorship, and cross-functional collaboration, with experience guiding globally distributed teams. Passionate about building reliable, resilient, and future-ready infrastructure that enables operational excellence and innovation at scale.

Core Skills

Cloud Architecture & Scalability

Designing and managing secure, highly available multi-cloud infrastructures across AWS, Azure, and GCP.

Infrastructure as Code (IaC)

Expertise in Terraform, Pulumi, and Ansible for automating infrastructure provisioning and ensuring consistency.

CI/CD Engineering

Building and securing pipelines with Jenkins, GitHub Actions, and ArgoCD, reducing release times and improving software quality.

Kubernetes Orchestration

Deploying and scaling Kubernetes clusters (EKS, AKS, GKE) with service mesh and autoscaling strategies.

Monitoring & Incident Response

Implementing observability with Prometheus, Grafana, ELK, and OpenTelemetry to reduce incident resolution time.

DevSecOps & Compliance

Embedding security tools (Vault, Trivy, Snyk) and automating compliance with OPA and Kyverno.

Programming & Scripting

Proficient in Python, Go, Java, and Bash for automation, API development, and custom DevOps tooling.

Technical Leadership

Leading remote teams, mentoring engineers, and fostering collaboration using Agile and remote-first practices.

Professional Experience

Senior DevOps Engineer | Oxagile

Mar 2023 – Present

- Designed enterprise-scale CI/CD pipelines with Jenkins, GitLab CI/CD, Spinnaker, and ArgoCD, accelerating release cycles by 70%.
- Migrated core services from monolithic to microservices, reducing deployment risk and enabling faster releases.
- Implemented GitOps workflows with Terraform and Pulumi, ensuring environment consistency and eliminating drift.
- Built observability dashboards with OpenTelemetry, Grafana, and ELK to track SLOs and SLIs.
- Collaborated with remote global teams across multiple time zones for efficient delivery.
- Conducted capacity planning, RCA, and performance tuning for high-availability systems.
- Automated compliance checks in CI/CD pipelines, supporting SOC2/ISO certifications.

SRE – Infrastructure & Cloud Reliability | CircleCI

Mar 2020 – Feb 2023

- Architected and managed **multi-cloud** infrastructure (AWS, Azure, GCP) with Kubernetes and IaC, ensuring **99.99%** uptime.
- Automated **CI/CD** pipelines with GitHub Actions and ArgoCD, reducing deployment time from **24h** to 2h and increasing release frequency by **60%**.
- Integrated **DevSecOps** tools (Snyk, Trivy, Vault), reducing vulnerabilities by **35%**.
- Built **observability** platforms (Prometheus, Grafana, ELK, Datadog), reducing **MTTR** by 40%.
- Implemented **chaos engineering** and disaster recovery drills, reducing downtime by **25%**.
- Mentored a **distributed team** of 8 engineers in IaC, monitoring, and automation best practices.
- Optimized **cloud spend**, saving **\$100K** annually through rightsizing and scaling strategies.

DevOps Engineer | Contino

Jan 2018 – Feb 2020

- Automated infrastructure with Terraform, Ansible, and Puppet, reducing manual effort by 70%.
- Deployed Kubernetes clusters for large-scale containerized workloads.
- Built reusable Terraform modules and Helm charts for standardized deployments.
- Developed DevOps tooling in Python and Go to streamline workflows.
- Established monitoring with Prometheus, ELK, and Grafana for production systems.
- Participated in 24/7 on-call rotations, conducting post-incident RCAs.
- Supported DevOps culture adoption through training on CI/CD and IaC best practices.

Education

B.Sc. in Computer Science
